

PRESS RELEASE

Ref: PR1905 – For immediate release

COMPANY NEWS

April 2019

1 week to go to until Powtech – Meet the team

Next week, April 9th – April 11th Eriez Europe will be exhibiting at stand 3-409, hall 3 at Powtech the world's leading trade fair for processing, analysis and handling of powder and bulk solids.

Visitors to the stand will have an exclusive look at the Xtreme Metal Detector, exhibited for the first time outside of the UK. The Xtreme Metal Detector is a feature-rich, multi-frequency unit designed to achieve the highest levels of detection. It is capable of detecting spheres down to 0.4mm – as small as a grain of salt. The Xtreme Metal Detector offers a major leap forward in performance and places Eriez at the forefront of the sector, with enhanced features, improved sensitivity, intuitive operation and exceptional reliability.

Also on show at Powtech will be grate magnets and magnetic traps from Eriez' extensive range of magnetic separators, ideal for the removal of small, fine tramp iron from dry, free-flowing products and providing protection for processing equipment. For accurate, highly responsive handling, including light and difficult to feed materials, Eriez will be showcasing their dual drive electromagnetic vibratory feeder.

Sarah Grain – Sales Manager

Work background and expertise

Sarah has a wealth of experience gained over 23 years with Eriez Europe, working with companies in mainland Europe and also globally. Sarah has worked with customers across multiple industries such as foods, processing, powders and bulk solids. Within these industries, Sarah has provided expert knowledge to customers from end users to engineering organisations setting up turnkey plants.

Thought's on exhibiting at Powtech 2019

"Powtech will offer an ideal opportunity for Eriez to showcase our extensive range of products and share our knowledge of metal separation and detection products with attendees. Last year Eriez Europe celebrated 50 years of sales and I am excited to engage with the visitor audience and use this wealth of experience to help solve their metal contamination problems."

Interesting fact

Sarah speaks fluent German and French and spent time living in Austria. Sarah is also excited to eat some "Lebkuchen", the local Nuremberg delicacy.

Paul Hale – Sales Manager, Metal Detection

Work background and expertise

Coming from an electronic engineering background, Paul has progressed within Eriez from production engineer to production manager to current role as sales manager. Paul has had 25 years of working closely with customers and has a wealth of knowledge on Eriez' metal detectors allowing specific solutions to be provided to customers problems across multiple industries.

Thought's on exhibiting at Powtech 2019

"It will be a major honour to exhibit the Xtreme Metal Detector for the first time outside of the UK to attendees of Powtech. After gathering crucial information from our customers, the Xtreme Metal Detector is one of our proudest product developments in recent years. As one of our flagship metal detection products, it provides unrivalled levels of detection, intuitive operation and excellent reliability."

Also on the Eriez stand at Powtech will be Marcel Gräf, German agent. He has extensive expertise and knowledge of the German market across processing, powder and bulk solids industries.

All of the sales team will be happy to discuss any metal separation or detection issues you may have in your organisation. To make an appointment with the team at Powtech or to secure your **free ticket**, contact Eriez on +44 (0)2920 868501 or email info-europe@eriez.com
